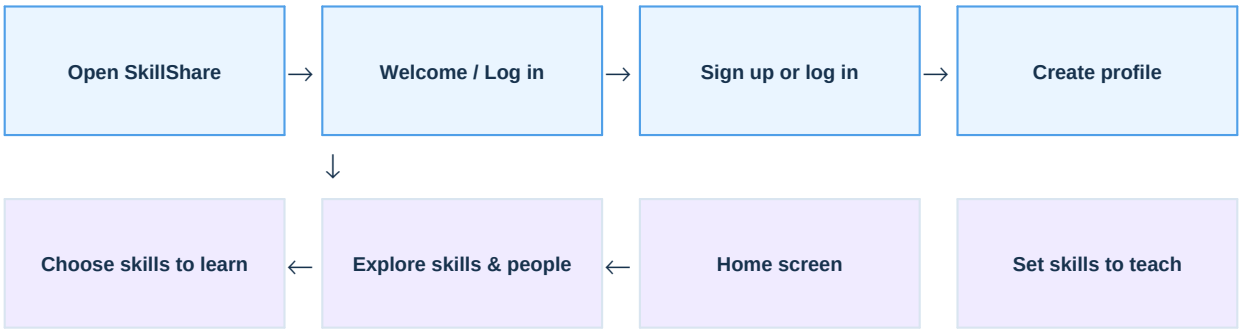
Task Flow

Primary task: a college student finds a peer to learn a skill from and starts a conversation.



MAIN USER TASK

01	**Open the app**	Student opens SkillShare and sees the welcome screen.
02	**Create account / log in**	Sign up using an available account option or log in.
03	**Create profile**	Enter name, college, username, and a short bio.
04	**Select skills**	Choose skills they can teach and skills they want to learn.
05	**Explore**	Browse recommendations or search for a skill or student.
06	**View a peer profile**	Review the student's listed skills to decide if they are a good match.
07	**Start a chat**	Open Messages and send a message about learning the skill.
08	**Arrange a skill exchange**	Agree on a time and how to learn or exchange skills.

ALTERNATE PATHS

Already have an account? Welcome → Log in → Home	**Not sure what to learn?** Home → Explore recommendations → View skill → View profile
Want to teach? Profile / Select Your Skills → Add a teachable skill → Explore matches	**Want to contact a peer?** Peer profile → Messages → Send message

Success state: The student completes a profile, finds a relevant peer, and sends a first message. Arranging a session is a suggested next step after messaging.
